Digital Portfolio

<https://meu-portfolio-tawny-iota.vercel.app/#projetos>

- **Frontend Architecture:** Developed with React and Tailwind CSS, utilizing advanced hooks (useEffect, useState) for state management and dynamic data fetching from the GitHub API v3.
- **User Experience (UX):** Implemented reactive interfaces and fluid animations using Framer Motion, ensuring superior performance and a mobile-first design.
- **Integration & Automation:** Built a fallback system for critical data and integrated dynamic icon libraries (Lucide React), demonstrating a focus on code scalability.
- **Corporate Methodology:** Documented workflow with management evidence via ClickUp, Git Flow, and focus on business rules (B2B Integrations).

Metrological Management SaaS

Lead Developer | Python (Flask), MySQL, SQLAlchemy
